

ABOVE GROUND Rainwater Harvesting

“Action Switch Box” - Automatic Mains Water Diversion

System Summary

The Action Switch Box is a complete pre-assembled mains water diversion system for above ground tanks that automatically controls the water supply for rainwater harvesting applications.

The benefit of this system is a significant reduction in installation cost for the builder/plumber/contractor and reduced long-term maintenance costs for the end-user.

System Benefits

- > WATERMARKED
- > CONVENIENT
- > SIGNIFICANT REDUCTION IN INSTALLATION COST
- > REDUCED LONG-TERM MAINTENANCE COST FOR END-USER
- > SYSTEM PROTECTED FROM THE ELEMENTS
- > AESTHETICALLY PLEASING
- > BOX DOES NOT VOID VISIBLE TERMITE BARRIER
- > FACTORY PRESSURE & PERFORMANCE TESTED

BOX DOES NOT VOID VISIBLE TERMITE BARRIER

Standard Inclusions

ACTION SWITCH BOX

- Onga SMH450 Pump
- Onga Water Switch (Watermarked)
- 3/4 inch mains water inlet
- 3/4 inch inlet strainer with isolation valve
- 3/4 inch outlet isolation valve
- 1 inch tank water inlet
- “Mains Water In Use” Indicator Light
- UV Stabilised Pump Box

Optional Extras

- Pump upgrade to Onga SMHW550 available for double-storey applications

WaterSwitch
Automatic Rainwater Controller
